→ EUPHEMISM

PREDOMINANTLY A FEMALE NAME. IN FRIESLAND IT'S A MALE NAME TOO.
I'M **FROM AMSTERDAM**, NOT FROM FRIESLAND (PARENTS :-)

→ FULLSTACK = FULLSTACK - CSS;
SANNE = **! FULLSTACK;** → AN ASSIGNMENT,
NOT A COMPARISON

MAIN TOPICS: INTERACTION DESIGN AND CODE
FOR **DIGITAL DESIGN BACHELOR** STUDENTS

JS? → ONLY IF I REALLY REALLY
REALLY REALLY REALLY HAVE TO.

→ GLADLY **STANDING ON THE SHOULDERS OF GIANTS** SUCH AS ANA TUDOR, LYNN FISHER, LEA,
SARA SOUEIDAN, VAL HEAD, SARAH DRASNER, MIRIAM SUZANNE, UNA KRAVETS AND MENEER VASIL

YOU'RE IN FOR 45 MINUTES OF

ANCHOR POSITIONING

And related stuff I like: math, animation, custom properties...

THE BEST WAY TO LEARN CSS IS

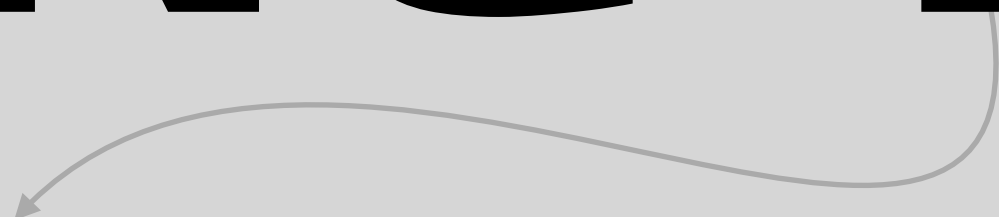

**DOING STUPID
EXPERIMENTS**

You will most certainly run into problems you didn't know you could run into,

and fun to do as well :)

AND

CSS IS MY GO-TO PROTO- TYPING TOOL

All the Web has to offer, with no limitations imposed by the tool maker

SOME GREAT RESOURCES

Chrome Canary

chrome://flags/

A screenshot of the Chrome Canary browser interface showing the 'chrome://flags/' page. The browser's address bar displays 'chrome://flags'. A search bar contains the text 'Experimental Web Platform features'. Below the search bar, the 'Experiments' section is visible, featuring a progress bar with 'Available' and 'Unavailable' segments. The 'Experimental Web Platform features' experiment is listed with a description and a dropdown menu set to 'Enabled'. The version number '136.0.7079.0' is shown in the top right corner. Annotations with arrows point from external text labels to specific elements: 'Chrome Canary' points to the logo, 'chrome://flags/' points to the address bar, 'Experimental Web Platform features' points to the search bar, and 'Enabled' points to the dropdown menu.

Experiments

Available Unavailable

Experimental Web Platform features
Enables experimental Web Platform features that are in development. – Mac, Windows, Linux, ChromeOS, Android
#enable-experimental-web-platform-features

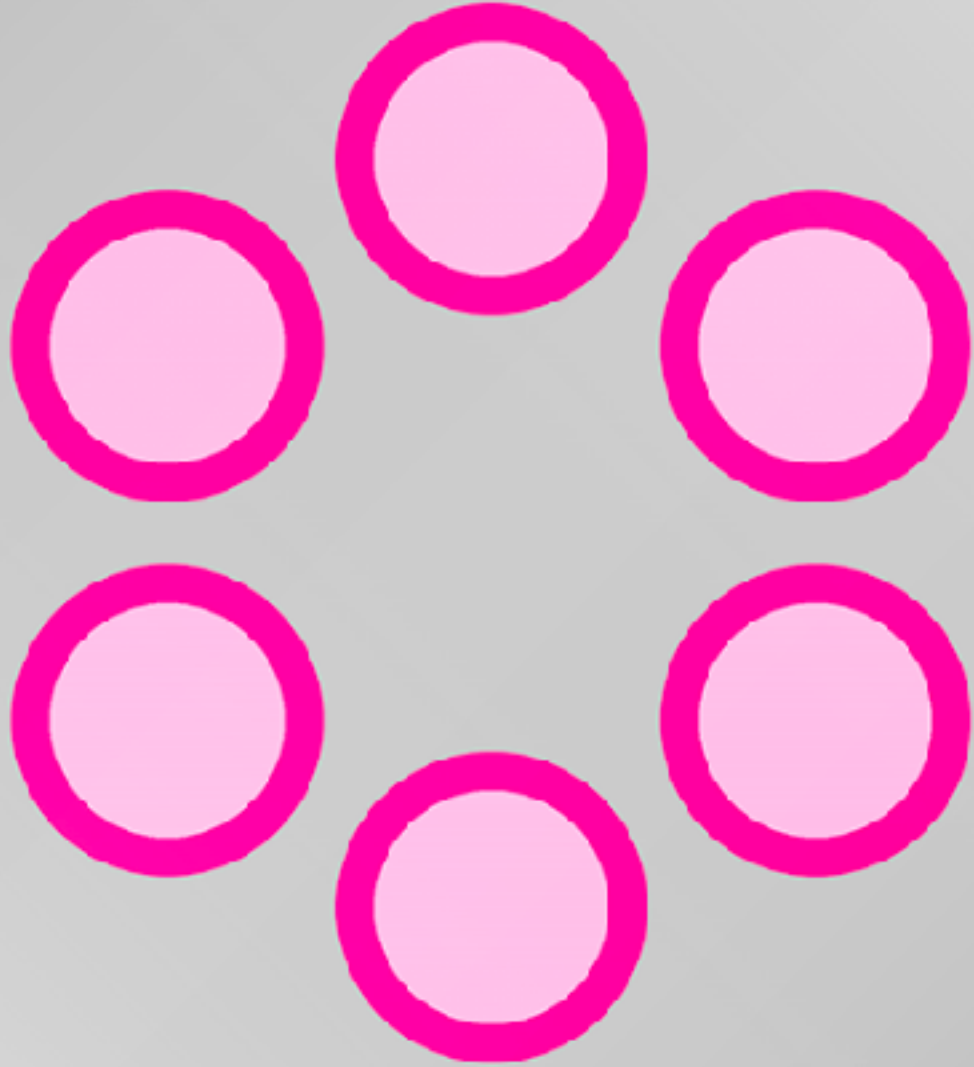

Enabled 136.0.7079.0

Enabled
